# LIGHTHOUSE WINDOWS

The first floor lighthouse windows are now concrete and the second and third floors are Plexiglas. These will all be replaced with strengthened glass and shutters.

The windows at the top are diamond shape. Each window will have a number and a plaque in the tower dedicating the window to the contributor.

The round windows in the tower are in an area that visitors will have to walk past to get to the top of the tower and the outside gallery.

The cellar windows are visible from the outside. Contributor plaques will be placed on the outside making them very visible.
